

### Highlights of the week:

Wow, what an exciting week for year 3! On Monday, we were all taking part in different activities. The girls enjoyed a trip to the high school, where they learnt lots of different football skills including passing, dribbling, goal keeping and scoring. The boys stayed at school with Mrs Deal, where they were creating different stories using lego models... they had lots of fun doing this!

This week, we also had a visit from a story teller named Chip. Chip told us a story and we realised how much we could remember when someone told us a story... we were able to recall lots of facts! We were so excited by this and we look forward to developing our story telling skills later on in the year.

The most exciting part of our week, however, was our amazing trip to the puppet theatre! At the puppet theatre we were able to explore our topic of light and dark further. We learnt all about the different properties of materials, and how they work in light and dark. After watching an amazing puppet show, we were able to create our own planets, using our knowledge of opaque, translucent and transparent materials. Take a look at our photos!

### Talk about

What was your child's favourite part of the trip?

### Maths fluency practise:

Practise counting in fours. You can also use hit the button for some times tables practise!

### Literacy Homework:

Over the half term, continue doing lots of reading and practising spelling!

### New vocabulary (Discuss these with your child and see if they can remember their meanings!):

Opaque, Translucent, Transparent

### Parent/Carer comment:

Week Beginning 16.10.2017

**Use this sheet to attach any work from the children/photos.**
